SUMMARY

Software Engineer with 4+ years of experience building and shipping production-grade systems across fintech, agri-tech, logistics, and e-commerce domains. I specialize in backend development — designing scalable architectures, optimizing databases, and owning projects end-to-end. Comfortable across the full stack, from Node.js APIs and PostgreSQL schemas to React-based backoffices and React Native (Expo) mobile apps.

SKILLS

Backend

Node.js, Express.js, Koa.js, PostgreSQL, MongoDB, Redis, SQS, Knex, TypeScript

Frontend

React, Next.js, TailwindCSS, Ant Design, React Native (Expo)

Infrastructure & Tools

AWS (EC2, S3), PM2, New Relic, Prometheus, Git, Postman, Linux

Concepts & Architectures

REST APIs, WebSockets, RPA, Microservices, Offline-first Architecture, Google Play Store Deployment

EXPERIENCE

Software Engineer (Freelance)

Woodbox Software Technologies

📅 04/2026 - Present 📍 Remote

♦ VyaparCred — Solar Financing Platform

Stack: Hercules.app · React · Convex · TypeScript · Puppeteer · MongoDB · AWS

- Architecting and building the platform using Hercules.app, owning the system end-to-end from design to deployment.
- Managing AWS EC2 infrastructure setup, hosting, and cloud deployment.
- Handling full project management — sprint planning, requirement clarification, testing, and bug fixes across all phases.
- Building buyer onboarding flow, financing negotiations, document uploads, solar product catalogue, and order management.

Senior Software Engineer

ServerLane Technologies

📅 03/2022 - 11/2025 📍 Mumbai, India

♦ Office Automation — Account & Transaction Management Platform

Stack: Node.js · PostgreSQL · Puppeteer · React · Next.js · TypeScript · MongoDB · SQS

- Built v2 platform with RBAC at the API level, transaction reconciliation, and bonus calculation across 6 offices.
- Managed multi-office data architecture supporting 6 offices and their sub-branches from a centralized database.
- Sole developer of RPA workflows using Puppeteer to automate data extraction from third-party sites.
- Improved DB performance by ~25% for 75k+ transactions via indexing, read/write separation, and query optimization.
- Integrated SQS queues and third-party webhooks for payment confirmations and transaction tracking.
- Delivered user-facing SPA alongside internal backoffice in React.

♦ Goldman City — Gold Loan Management Application

Stack: Node.js · Express · PostgreSQL · React · Redis · Flutter

- Led backend development and built the React admin panel as primary engineer.
- Managed mobile app deployment to Play Store; acted as code reviewer for intern.

♦ Protopak — 3D Food Packaging Customizer

Stack: Next.js · Tailwind CSS · Express · PostgreSQL · Pacdora API

- Sole engineer; integrated Pacdora API for 3D in-browser packaging editor.
- Built full backoffice covering product customization, order management, delivery and user management.

EXPERIENCE

Software Engineer

TidalWave Technology Limited

📅 03/2021 - 03/2022 📍 Navi Mumbai

◆ Fefifo — Agri-Tech Platform

Stack: Koa.js · ArangoDB · PouchDB · CouchDB · React Native (Expo) · React · Ant Design · AWS (EC2, S3)

- Built and maintained Koa.js backend APIs across 30+ modules; fixed legacy bugs and developed new APIs.
- Designed and owned ArangoDB schemas for harvest tracking, worker salary management, and per-crop tracking.
- Developed React backoffice screens for worker, admin, and operator management — harvest cycles, reports, and salary.
- Maintained a private npm package shared across backend and mobile — handled versioning, publishing, and deployment.
- Built offline-first React Native app with PouchDB/CouchDB sync for field workers in low/no connectivity environments.
- Participated in daily client-facing standups, communicating progress and clarifying requirements directly.

Software Engineer Intern

TidalWave Technology Limited

📅 11/2020 - 03/2021 📍 Navi Mumbai

◆ Fefifo — Agri-Tech Platform (React Native)

Stack: React Native · Koa.js · ArangoDB

- Worked on the React Native mobile application building and integrating core app modules.
- Gained hands-on backend exposure by making database query changes in Koa.js as part of feature development.

Software Developer Intern

CreativeWebo Digital Agency

📅 11/2019 - 01/2020 📍 Kurla, Mumbai

◆ care32dental.com — Dental Clinic Website

Stack: WordPress + Elementor · PHP · MySQL · HTML

- Injected custom PHP scripts to integrate a payment gateway into an existing WordPress site.
- Implemented membership plan selection with custom HTML receipts and invoices.
- Automated email delivery to customers post-payment.
- Deployed updates via FileZilla FTP client to a custom cPanel hosting environment.

◆ AU Bank — Mobile Banking App

Stack: React Native

- Built the Home module UI of the AU Bank mobile app with navigation flow and API integration.
- Developed user onboarding flow handling screen transitions and user state.
- Followed and implemented team-defined folder structure and coding conventions.
